The Project

Theme:

I chose the video game theme because after I receive my bachelor's degree, I plan on getting my masters degree in the video game industry. I have always been interested in web design and development for many years now but I do have an interest in the video game industry as well.

The company is fictional and the name of it is Gaming Earth. With this company the main point is to have other gamers see popular conventions, see stats of games or game consoles sold and which games and consoles are in demand. I believe my design would work for this company because it is user friendly, understandable, and easy to navigate through the pages.
